

AXENDO 80

New

The AXENDO 80 has 2 high-power REBEL® LEDs and features the unique Reverse Beam Technology® which projects an impressive 80 Lux light output in a bright – but non-blinding - light beam.

The headlamp is equipped with a high beam function of +80 Lux. To operate the high beam it is supplied with the special SW007 handlebar switch.

Only compatible with e-bike systems providing a minimum of 4W power for lighting.
